

TECHNICAL CARD

PRODUCT NAME : Anchor M20 – Ø27 L-160

ITEM CODE : 12.100

TECHNICAL DATA: Material – S235JR steel
Weight of 1 pc – 0.25 kg
Coating – galvanic zinc
Color – white zinc

APPLICATION : The pipe anchor is used for embedding in solid concrete. The shape of the anchor allows it to be durable and quick seating with using much less material binding chemical anchor. The body of the anchor in the form of a cylindrical tube has a narrow diameter at the front, along which length there is an internal thread into which the hinge can be screwed. The anchor has a circumferentially profiled narrowing reducing the diameter, constituting a point of accumulation of the binding material, facilitating the connection of the anchor with the ground. The spherical plug at the end of the anchor facilitates even distribution of the bonding material to the sides when placed in the hole.

PRODUCER : Komet company – Polish producer of construction hardware for gates.

INNOVATION : **Product protected by patent low W.128101**
